# 1 GENERAL INFORMATION

These disclosures were validated and approved for publication by the Board of Directors in October 2024.

## 1.1 Introduction

Avanzia Bank S.A. (hereafter also referred to as “the Bank” or “Avanzia”) publishes a Pillar III disclosure report in compliance with Part Eight of the European Directive (EU) 575/2013 on prudential requirements for credit institutions and investment firms also known as Capital Requirements Regulation (CRR). The legislation was published on 27 June 2013 and fully entered into force on 17 July 2013. Avanzia was required to apply the new rules from 1 January 2014. The report is published also in compliance with national transposition regulations, regulation 14-01 and circular 14/583, issued by the national supervisory body CSSF taking into account Guidelines from the European Banking Authority (EBA)<sup>1</sup>.

CRR is derived from the Basel III standards issued by the Basel Committee on Banking Supervision (BCBS) and is built on three pillars:

Pillar I:	Minimum capital requirements
Pillar II:	Supervisory review and evaluation process
Pillar III:	Market discipline

Basel III is an internationally agreed set of measures developed by BCBS to strengthen the regulation, supervision and risk management of banks.

## 1.2 Scope of application (Art. 431 and 436 CRR)

The Bank has adopted a policy to comply with the disclosure requirements of CRR Part 8 in relation to the appropriateness including their verification and frequency.

The Pillar III report contains the information of Avanzia Bank S.A. as of 31 December 2023 on a standalone basis as the Bank does not have any subsidiaries or branches.

The Internal Audit function is included in the review process of the Pillar III report before it is published.

## 1.3 Frequency and location of disclosure (Art. 432 and 433 CRR)

Avanzia Bank S.A. publishes the Pillar III disclosure report on an annual basis.

The report will be published on Avanzia’s corporate website ([advanzia.com](http://advanzia.com)) and will not be subject to external audit, except to the extent that any disclosures are equivalent to those made in the annual accounts.

---

<sup>1</sup> In particular EBA/GL/2018/10, EBA/GL/2017/01, EBA/GL/2016/11 and EBA/GL/2015/22 respectively adopted by the CSSF in its Circulars 20/751, 18/676, 17/673 and 17/658 as amended.

#### **1.4 Materiality (Art. 432 CRR)**

According to CRR Art. 432 (1) institutions may omit one or more of the disclosures if the information provided by such disclosures is not regarded as material, except for the disclosures laid down in Art. 435(2)(c), Art. 437 and Art. 450.

Information is not material if its omission or misstatement could not change or influence the assessment or decision of a user relying on that information for the purpose of making economic decisions.

#### **1.5 Proprietary or confidential information (Art. 432 CRR)**

According to CRR Art. 432(2) institutions may omit one or more items of information included in the disclosures listed in Titles II and III if those items include information which is regarded as proprietary or confidential, except for the disclosures laid down in Art. 437 and Art. 450.

Information shall be regarded as proprietary to institutions if disclosing it publicly would undermine its competitive position. It may include information on products or systems which, if shared with competitors, would render an institution's investments therein less valuable. Information shall be regarded as confidential if there are obligations to customers or other counterparty relationships binding an institution to confidentiality.

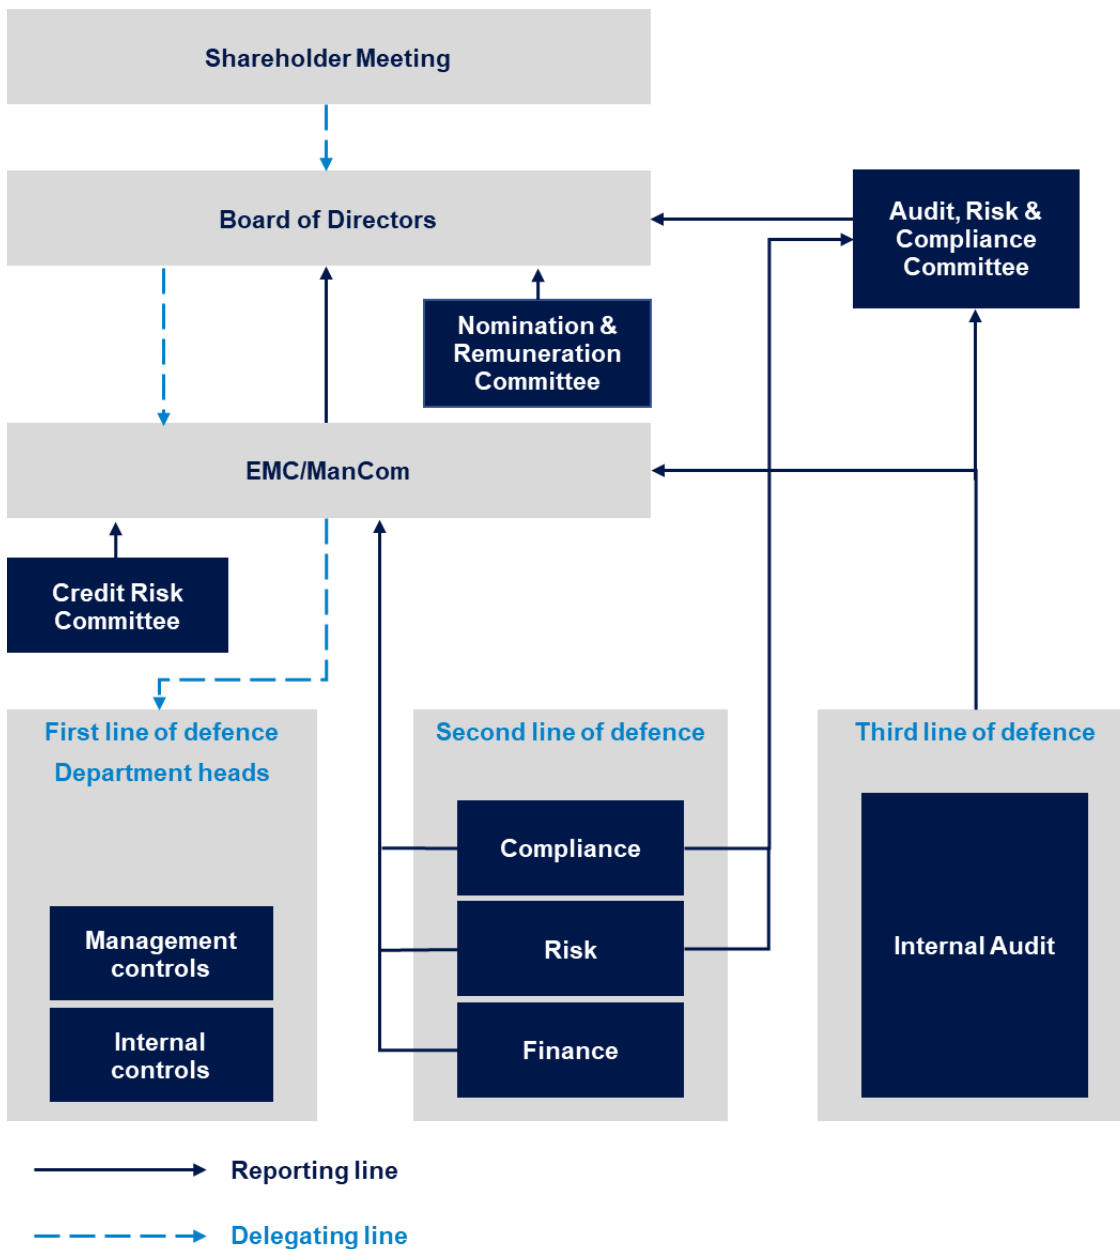

Where information has been omitted from this disclosure in relation to the CRR Art. 432, this has been stated in the relevant sections.

## **2 GOVERNANCE AND RISK MANAGEMENT FRAMEWORK**

### **2.1 Governance framework (Art. 435 CRR)**

To ensure the effectiveness of Advanzia's risk management framework, the Board of Directors and the Management Committee have established the "Three lines of defence" model which is in line with the provisions of CSSF Circular 12/552 (as amended).

- **First line of defence:** Consists of the business units that take or acquire risks under a predefined policy and limits and carry out controls (CSSF 12/552, Section 6.1.1),
- **Second line of defence:** Formed by the support functions, including the financial and accounting function (CSSF 12/552, Section 5.3.2) as well as the IT function (CSSF 12/552, Section 5.3.3), and the compliance and risk control functions (CSSF 12/552, Sub-chapter 6.2 and Sections 6.2.5 and 6.2.6) which contribute to the independent risk control,
- **Third line of defence:** Consists of the internal audit function which, pursuant to CSSF 12/552 Sub-chapter 6.2 and Section 6.2.7, provides an independent, objective and critical review of the first two lines of defence.

**Board of Directors**

The Board of Directors of Advanzia is responsible for establishing the main principles for risk taking and management. It also determines the risk appetite in relation to the nature and business of Advanzia. The Board approves risk levels and risk measures. Detailed information in relation to the composition of the Board of Advanzia is accessible on Advanzia's website: <https://www.advanzia.com/en-gb/about-us/investor-relations>.

The following table summarises the number of directorships held by the members of the management body:

<b>Board member</b>	<b>Number of directorships held (including intragroup directorships)</b>
Mr. Bengt Arve Rem	20 (incl. Advanzia Bank S.A.)
Mr. Eirik Holtedahl	2 (incl. Advanzia Bank S.A.)
Mr. Tor Erland Fyksen	3 (incl. Advanzia Bank S.A.)
Mr. Nishant Falia	7 (incl. Advanzia Bank S.A.)
Mr. Wiljar Nesse	3 (incl. Advanzia Bank S.A.)

#### *Nomination & Remuneration Committee*

In order to assist the Board in overseeing the Bank’s remuneration policy and making recommendations on the basis of such policy, the Board has established a Nomination & Remuneration Committee (NRC). The NRC is responsible for assessing the mechanisms and systems adopted to ensure that the remuneration system takes into account all types of risks, liquidity and capital levels and that the overall remuneration policy is consistent with and promotes sound and effective risk management.

#### *Audit, Risk & Compliance Committee*

The Board has established an Audit, Risk & Compliance Committee (ARC). The ARC provides a structured, systematic oversight of the Bank’s governance, risk management and internal control practices. The committee assists the Board and management by providing advice and guidance on the adequacy of the Bank’s initiatives for governance structure, compliance, risk management, internal control framework, activities of internal and external auditors and financial statements and public accountability reporting.

#### *Executive Management Committee (EMC) / Management Committee (ManCom)*

The Executive Management Committee approves the risk management process. The EMC also delegates to each Department Head the task to identify and follow up on risks within their area of responsibility. The EMC will give its appraisal of relevant risks and report this to the Board.

#### *Department Head (1st line of defence)*

Each department head is responsible for identifying all risk areas in their range of responsibilities. This work is done in cooperation with the Chief Risk Officer (CRO). The department head is responsible for defining proper routines and procedures for mitigating the risks. This work is done in close cooperation with the individuals actually performing the applicable functions. The department head is also responsible for following up any risk response that has arisen within the CRO’s area as a consequence of ICAAP and ILAAP (or other risk assessment procedure).

#### *Chief Risk Officer (2nd line of defence)*

The Chief Risk Officer (CRO) defines the risk management process. The CRO is responsible for identifying the ICAAP and ILAAP relevant risks. The CRO is also responsible for categorising and validating the risks to which Advanzia is subject. The CRO is also responsible for overseeing that the department heads have

completed the prescribed risk analyses and risk reviews in their respective areas of responsibility, and that the measures are implemented.

*Data Protection Officer (2nd line of defence)*

The Data Protection Officer (DPO) informs and advises the Bank and the employees who carry out processing of their obligations related to data protection matters; monitors compliance with data protection laws (e.g., GDPR) and with the policies of the Bank related to the protection of personal data, including the assignment of responsibilities, awareness-raising and training of staff involved in processing operations and the related audit. The DPO also provides advice in regard to the data protection impact assessment and monitors its performance; he cooperates with the supervisory authority and acts as the contact point for the supervisory authority on issues relating to processing, including the prior consultation in accordance with GDPR.

*Compliance Function (2nd line of defence)*

The Compliance function ensures compliance with external rules and regulations that are imposed on the Bank as a whole, and the compliance with internal systems of control that are imposed to achieve compliance with the externally imposed rules and regulations.

*Finance Department (2nd line of defence)*

The Finance department ensures monitoring and reporting on financial key performance indicators through its budgeting and controlling activities.

*Internal Audit Function (3rd line of defence)*

The Internal Audit function is to provide independent assurance that the Bank's governance, risk management and internal control processes are operating effectively. The internal audit has a functional reporting line to the Audit, Risk & Compliance Committee, making it independent of the executive.

## **2.2 Risk management framework (Art. 435 CRR)**

According to the Circular CSSF 12/552 as amended and the Risk and Own Funds Strategy of the Bank, the Board of Directors shall decide on acceptable types and an associated level of risk appetite in relation to the objectives of the Bank.

As a general guideline, the Board of Directors accepts risks which are within the decided appetite by type of risk. Risks exceeding the decided level of risk appetite shall not be accepted, unless the management ensures that all relevant corrective measures have been taken in order to bring the risk within the decided threshold.

The management presents its proposal for concrete targets for the relevant budget period, and the decided targets should be included in the approved budget document for the relevant year. The Board of Directors can delegate to the management to decide on the acceptable level for other non-material risks.

By the nature of its business and operations, Advanzia will undertake certain risks. The Bank has identified that credit and liquidity risks are the largest risks to which the Bank is subject. Given the nature of Advanzia, proper acceptance and management of credit and funding risks remains the quintessence for the Bank's long-term profitability and success. Thus, the Board of Directors accepts that Advanzia will take on a certain

amount of credit and liquidity risk in exchange for creating an acceptable level of return. The development of the risk-reward relationship will be monitored and adjusted for optimal performance with the objective of creating long-term value for the Bank.

On the other hand, all other risks not directly associated with achieving the objectives of the Bank are to be either minimised or avoided, if possible. One of the key success factors for achieving this strategy is to focus on few and simple products and related core operations. These should be produced in an organisation with outsourcing of functions when deemed beneficial, while maintaining a focus on control of costs and risks well within the boundaries of the regulatory framework.

Having regard to the current nature, size and complexity of the Bank's activities, the Board considers the current risk management measures to be appropriate and in line with the current risk profile and risk strategy of the Bank.

Please note that further information in relation to the risks faced by the Bank can be found under Section 6.

## 2.3 Risk appetite

The Board of Directors decides on acceptable and unacceptable types of risk. As a general guideline, the Board of Directors accepts risks which are within the decided appetite by type of risk. Risks exceeding the decided level of risk appetite are not accepted.

Avanzia considers its risk appetite as proprietary information and therefore opts for non-disclosure in accordance with CRR Art. 432(2).

## 3 OWN FUNDS (ART. 437 & 447 CRR)

### 3.1 Equity reconciliation

The Bank's supervisor, the Commission de Surveillance du Secteur Financier (CSSF) sets and monitors capital requirements for the Bank. According to applicable regulations relating to capital adequacy, credit institutions are required to dispose sufficient capital resources to cover different types of risks.

With effect from 1 January 2008 the Bank is complying with the provisions of the Basel 2 framework in respect of regulatory capital. The Bank is following the standardised approach to credit risk and the Alternative Standardised Approach (ASA) for operational risk, in order to calculate the Basel 2 Pillar I minimum requirements. Luxembourg adopted in 2014 the Capital requirements regulation and directive – CRR/CRD IV (Regulation (EU) No 575/2013), and as such Avanzia is subject to the Basel 3 requirements as implemented in said regulation.

(in MEUR)	IFRS	Regulatory adjustments	Own funds
Subscribed capital	17.6	0.0	17.6
Issue premiums	9.9	0.0	9.9
Other reserves	41.3	0.0	41.3
Profit carried forward	216.4	0.0	216.4

Interim profits	0.0	23.8	23.8
Additional Tier 1 capital	0.0	98.7	98.7
Other transitional adjustments to CET1 capital	0.0	0.8	0.8
Additional Tier 2 capital	0.0	55.0	55.0
Deductions from capital	0.0	-23.7	-23.7
<b>Total</b>	<b>285.2</b>	<b>154.6</b>	<b>439.8</b>

Pursuant to CRR article 36 (1) the Bank has deducted its intangible assets from its own funds.

Avanzia's own funds consist of Tier 1 and Tier 2 capital, which includes ordinary subscribed capital. Issue premiums, legal reserves, as well as reserves for reduction of net wealth tax (both included in "reserves") and retained earnings, after deductions for intangible assets and other regulatory adjustments relating to items that are included in equity but are treated differently for capital adequacy purposes.

#### Common Equity Tier 1 (CET1) capital: Instruments and reserves

1	Capital instruments and the related share premium accounts	27.5	26 (1), 27, 28, 29
	of which: Share capital	17.6	EBA list 26 (3)
	of which: Share premium	9.9	EBA list 26 (3)
	of which: Instrument type 3	0.0	EBA list 26 (3)
2	Retained earnings	281.4	26 (1) (c)
3	Accumulated other comprehensive income (and other reserves)		26 (1)
3a	Funds for general banking risk		26 (1) (f)
4	Amount of qualifying items referred to in Article 484 (3) and the related share premium accounts subject to phase out from CET1		486 (2)
5	Minority interests (amount allowed in consolidated CET1)		84
5a	Independently reviewed interim profits net of any foreseeable charge or dividend		26 (2)
6	<b>Common Equity Tier 1 (CET1) capital before regulatory adjustments</b>	308.9	Sum of rows 1 to 5a

#### Common Equity Tier 1 (CET1) capital: regulatory adjustments

7	Additional value adjustments (negative amount)	0.8	34, 105
8	Intangible assets (net of related tax liability) (negative amount)	-23.7	36 (1) (b), 37
9	Empty set in the EU		
10	Deferred tax assets that rely on future profitability excluding those arising from temporary differences (net of related tax liability where the conditions in Article 38 (3) are met) (negative amount)		36 (1) (c), 38
11	Fair value reserves related to gains or losses on cash flow hedges		33(1) (a)
12	Negative amounts resulting from the calculation of expected loss amounts		36 (1) (d), 40, 159
13	Any increase in equity that results from securitised assets (negative amount)		32 (1)

14	Gains or losses on liabilities valued at fair value resulting from changes in own credit standing		33(1) (b)
15	Defined-benefit pension fund assets (negative amount)		36 (1) (e), 41
16	Direct and indirect holdings by an institution of own CET1 instruments (negative amount)		36 (1) (f), 42
17	Direct, indirect and synthetic holdings of the CET1 instruments of financial sector entities where those entities have reciprocal cross holdings with the institution designed to inflate artificially the own funds of the institution (negative amount)		36 (1) (g), 44
18	Direct, indirect and synthetic holdings by the institution of the CET1 instruments of financial sector entities where the institution does not have a significant investment in those entities (amount above 10 % threshold and net of eligible short positions) (negative amount)		36 (1) (h), 43, 45, 46, 49 (2) (3), 79
19	Direct, indirect and synthetic holdings by the institution of the CET1 instruments of financial sector entities where the institution has a significant investment in those entities (amount above 10 % threshold and net of eligible short positions) (negative amount)		36 (1) (i), 43, 45, 47, 48 (1) (b), 49 (1) to (3), 79
20	Empty set in the EU		
20a	Exposure amount of the following items which qualify for a RW of 1250 %, where the institution opts for the deduction alternative		36 (1) (k)
20b	of which: qualifying holdings outside the financial sector (negative amount)		36 (1) (k) (i), 89 to 91
20c	of which: securitisation positions (negative amount)		36 (1) (k) (ii), 243 (1) (b), 244 (1) (b), 258
20d	of which: free deliveries (negative amount)		36 (1) (k) (iii), 379 (3)
21	Deferred tax assets arising from temporary differences (amount above 10 % threshold, net of related tax liability where the conditions in Article 38 (3) are met) (negative amount)		36 (1) (c), 38, 48 (1) (a)
22	Amount exceeding the 15 % threshold (negative amount)		48 (1)
23	of which: direct and indirect holdings by the institution of the CET1 instruments of financial sector entities where the institution has a significant investment in those entities		36 (1) (i), 48 (1) (b)
24	Empty set in the EU		
25	of which: deferred tax assets arising from temporary differences		36 (1) (c), 38, 48 (1) (a)
25a	Losses for the current financial year (negative amount)		36 (1) (a)
25b	Foreseeable tax charges relating to CET1 items (negative amount)		36 (1) (l)
27	Qualifying AT1 deductions that exceed the AT1 capital of the institution (negative amount)		36 (1) (u)
28	<b>Total regulatory adjustments to Common Equity Tier 1 (CET1)</b>	-22.9	Sum of rows 7 to 20a, 21, 22 and 25a to 27
29	<b>Common Equity Tier 1 (CET1) capital</b>	286.0	Row 6 minus row 28
<b>Additional Tier 1 (AT1) capital: Instruments</b>			
30	Capital instruments and the related share premium accounts	98.7	51, 52
31	of which: classified as equity under applicable accounting standards		
32	of which: classified as liabilities under applicable accounting standards	98.7	
33	Amount of qualifying items referred to in Article 484 (4) and the related share premium accounts subject to phase out from AT1		486 (3)
34	Qualifying Tier 1 capital included in consolidated AT1 capital (including minority interests not included in row 5) issued by subsidiaries and held by third parties		85, 86
35	of which: instruments issued by subsidiaries subject to phase out		486 (3)

36	<b>Additional Tier 1 (AT1) capital before regulatory adjustments</b>	98.7	Sum of rows 30, 33 and 34
<b>Additional Tier 1 (AT1) capital: regulatory adjustments</b>			
37	Direct and indirect holdings by an institution of own AT1 instruments (negative amount)		52 (1) (b), 56 (a), 57
38	Direct, indirect and synthetic holdings of the AT1 instruments of financial sector entities where those entities have reciprocal cross holdings with the institution designed to inflate artificially the own funds of the institution (negative amount)		56 (b), 58
39	Direct, indirect and synthetic holdings of the AT1 instruments of financial sector entities where the institution does not have a significant investment in those entities (amount above 10 % threshold and net of eligible short positions) (negative amount)		56 (c), 59, 60, 79
40	Direct, indirect and synthetic holdings by the institution of the AT1 instruments of financial sector entities where the institution has a significant investment in those entities (net of eligible short positions) (negative amount)		56 (d), 59, 79
41	Empty set in the EU		
42	Qualifying T2 deductions that exceed the T2 capital of the institution (negative amount)		56 (e)
43	<b>Total regulatory adjustments to Additional Tier 1 (AT1) capital</b>	0	Sum of rows 37 to 42
44	<b>Additional Tier 1 (AT1) capital</b>	98.7	Row 36 minus row 43
45	<b>Tier 1 capital (T1 = CET1 + AT1)</b>	384.7	Sum of row 29 and row 44
<b>Tier 2 (T2) capital: Instruments and provisions</b>			
46	Capital instruments and the related share premium accounts	55.0	62, 63
47	Amount of qualifying items referred to in Article 484 (5) and the related share premium accounts subject to phase out from T2		486 (4)
48	Qualifying own funds instruments included in consolidated T2 capital (including minority interests and AT1 instruments not included in rows 5 or 34) issued by subsidiaries and held by third parties		87, 88
49	of which: instruments issued by subsidiaries subject to phase out		486 (4)
50	Credit risk adjustments		62 (c) & (d)
51	<b>Tier 2 (T2) capital before regulatory adjustments</b>	55.0	
<b>Tier 2 (T2) capital: regulatory adjustments</b>			
52	Direct and indirect holdings by an institution of own T2 instruments and subordinated loans (negative amount)		63 (b) (i), 66 (a), 67
53	Holdings of the T2 instruments and subordinated loans of financial sector entities where those entities have reciprocal cross holdings with the institution designed to inflate artificially the own funds of the institution (negative amount)		66 (b), 68
54	Direct and indirect holdings of the T2 instruments and subordinated loans of financial sector entities where the institution does not have a significant investment in those entities (amount above 10 % threshold and net of eligible short positions) (negative amount)		66 (c), 69, 70, 79
55	Direct and indirect holdings by the institution of the T2 instruments and subordinated loans of financial sector entities where the institution has a significant investment in those entities (net of eligible short positions) (negative amount)		66 (d), 69, 79
56	Empty set in the EU		
57	<b>Total regulatory adjustments to Tier 2 (T2) capital</b>		Sum of rows 52 to 56
58	<b>Tier 2 (T2) capital</b>	55.0	Row 51 minus row 57
59	<b>Total capital (TC = T1 + T2)</b>	439.7	Sum of row 45 and row 58
60	<b>Total risk weighted assets</b>	2 268.2	

**Capital ratios and buffers**

61	Common Equity Tier 1 (as a percentage of total risk exposure amount)	12.61%	92 (2) (a)
62	Tier 1 (as a percentage of total risk exposure amount)	16.96%	92 (2) (b)
63	Total capital (as a percentage of total risk exposure amount)	19.39%	92 (2) (c)
64	Institution specific buffer requirement (CET1 requirement in accordance with article 92 (1) (a) plus capital conservation and countercyclical buffer requirements, plus systemic risk buffer, plus systemically important institution buffer expressed as a percentage of risk exposure amount)	71.8	CRD 128, 129, 130, 131, 133
65	of which: capital conservation buffer requirement	56.7	
66	of which: countercyclical buffer requirement	15.1	
67	of which: systemic risk buffer requirement		
67a	of which: Global Systemically Important Institution (G-SII) or Other Systemically Important Institution (O-SII) buffer		
68	Common Equity Tier 1 available to meet buffers (as a percentage of risk exposure amount)		CRD 128
69	[non relevant EU regulation]		
70	[non relevant EU regulation]		
71	[non relevant EU regulation]		

**Amounts below the thresholds for deduction (before risk weighting)**

72	Direct and indirect holdings of the capital of financial sector entities where the institution does not have a significant investment in those entities (amount below 10 % threshold and net of eligible short positions)		36 (1) (h), 46, 45 56 (c), 59, 60 66 (c), 69, 70
73	Direct and indirect holdings of the CET1 instruments of financial sector entities where the institution has a significant investment in those entities (amount below 10 % threshold and net of eligible short positions)		36 (1) (i), 45, 48
74	Empty set in the EU		
75	deferred tax assets arising from temporary differences (amount below 10 % threshold, net of related tax liability where the conditions in Article 38 (3) are met)		36 (1) (c), 38, 48

**Applicable caps on the Inclusion of provisions In Tier 2**

76	Credit risk adjustments included in T2 in respect of exposures subject to standardised approach		62
77	Cap on inclusion of credit risk adjustments in T2 under standardised approach		62
78	Credit risk adjustments included in T2 in respect of exposures subject to internal ratings-based approach		62
79	Cap for inclusion of credit risk adjustments in T2 under internal ratings-based approach		62
80	Current cap on CET1 instruments subject to phase out arrangements		484 (3), 486 (2) & (5)
81	Amount excluded from CET1 due to cap		484 (3), 486 (2) & (5)
82	Current cap on AT1 instruments subject to phase out arrangements		484 (4), 486 (3) & (5)
83	Amount excluded from AT1 due to cap		484 (4), 486 (3) & (5)
84	Current cap on T2 instruments subject to phase out arrangements		484 (5), 486 (4) & (5)
85	Amount excluded from T2 due to cap		484 (5), 486 (4) & (5)

### 3.2 Description of equity items

The Bank's regulatory capital consists of Tier 1 and Tier 2 capital, which includes the fully paid in subscribed capital, issue premiums, legal reserves as well as reserves for reduction of net wealth tax (both included in "Reserves") and retained earnings.

#### 3.2.1 Additional Tier 1

Capital instruments main features template		Additional Tier 1
1	Issuer	Avanzia Bank S.A.
2	Unique identifier (e.g. CUSIP, ISIN or Bloomberg identifier for private placement)	NO0010858970
3	Governing law(s) of the instrument	The Capital Securities are governed by, and construed in accordance with the laws of Norway
Regulatory treatment		
4	Transitional CRR rules	Tier 1
5	Post-transitional CRR rules	Eligible
6	Eligible at solo/ (sub-)consolidated/ solo & (sub-)consolidated	N/A
7	Instrument type (types to be specified by each jurisdiction)	Tier 1 as published in Regulation (EU) No 575/2013 article 52
8	Amount recognised in regulatory capital (in EUR million, as of most recent reporting date)	19.0
9	Nominal amount of instrument	225 000 000 NOK
9a	Issue price	100 per cent of the Aggregate Nominal Amount
9b	Redemption price	Redemption at par
10	Accounting classification	Subordinated liability
11	Original date of issuance	12/07/2019
12	Perpetual or dated	Perpetual
13	Original maturity date	N/A
14	Issuer call subject to prior supervisory approval	Yes
15	Optional call date, contingent call dates, and redemption amount	Earliest 12/07/2024 at par
16	Subsequent call dates, if applicable	Each distribution date commencing 12/07/2024
Coupons / dividends		
17	Fixed or floating dividend/coupon	Floating
18	Coupon rate and any related index	7 per cent per annum + three months NIBOR
19	Existence of a dividend stopper	No
20a	Fully discretionary, partially discretionary or mandatory (in terms of timing)	Fully discretionary
20b	Fully discretionary, partially discretionary or mandatory (in terms of amount)	Fully discretionary
21	Existence of step up or other incentive to redeem	No
22	Noncumulative or cumulative	N/A
23	Convertible or non-convertible	Non-convertible
24	If convertible, conversion trigger (s)	N/A
25	If convertible, fully or partially	N/A

26	If convertible, conversion rate	N/A
27	If convertible, mandatory or optional conversion	N/A
28	If convertible, specify instrument type convertible into	N/A
29	If convertible, specify issuer of instrument it converts into	N/A
30	Write-down features	Yes
31	If write-down, write-down trigger (s)	7% of CET1
32	If write-down, full or partial	Full
33	If write-down, permanent or temporary	Permanent
34	If temporary write-down, description of write-up mechanism	N/A
35	Position in subordination hierarchy in liquidation (specify instrument type immediately senior to instrument)	(i) Pari passu with the existing AT1 instruments of the issuer, and any other obligations or capital instruments of the issuer that rank or are expressed to rank pari passu with the Bonds on a liquidation or bankruptcy of the issuer and the right to receive repayment of capital on a liquidation or bankruptcy of the issuer, (ii) Senior to holders of the issuer's CET1 instruments and any other obligations or capital instruments of the issuer that rank or are expressed to rank junior to the Bonds on a liquidation or bankruptcy of the issuer and the right to receive repayment of capital on a liquidation or bankruptcy of the issuer, and (iii) junior to any present or future depositors of the issuer, any other unsubordinated creditors of the issuer, and subordinated creditors of the issuer including holders of Tier 2 instrument other than the present and future claims of creditors that rank or are expressed to rank pari passu with or junior to the Bonds.
36	Non-compliant transitioned features	No
37	If yes, specify non-compliant features	N/A

## 4 CAPITAL REQUIREMENTS (ART. 438 CRR)

### 4.1 Pillar I capital requirements

In conformity with Regulation (EU) 575/2013, the Bank's total own funds must equal at least 8% of the Capital Requirements for Operational Risk, Credit Risk and Market Risk multiplied by 12.5. The CSSF requests Advanzia to permanently maintain a minimum total capital ratio of 15.5% and a CET 1 ratio of 9.8% (as of 30 April 2021).

Advanzia calculates its capital requirements in accordance with chapter 2 of part three, title II by adapting 8% of the risk-weighted exposure amounts for each of the exposure classes specified in article 112.

The minimum capital requirements (8% of risk-weighted assets) disclosed according to their computation method are shown in the following table:

Template EU OV1 – Overview of risk weighted exposure amounts

(in MEUR)		Risk weighted exposure amounts (RWEAs)		Total own funds requirements
		a	b	c
		2023-Q4	2022-Q4	2023-Q4

## 4.2 Pillar II capital requirements

Avanzia Bank's ICAAP and ILAAP Procedure, approved by the Management Committee, govern the ICAAP and ILAAP for Avanzia Bank. The ICAAP and ILAAP process follows an annual cycle, and consists of the following:

- Budget process in Avanzia, where strategy, development, risks, profitability and solidity are determined, and the assessment of the ICAAP and ILAAP is performed in relation to this process.
- Annual ICAAP and ILAAP review (Risk and Own Funds Strategy), providing the description of the ICAAP and ILAAP framework, risk appetite limits and an in-depth risk assessment, produced by the Risk Control function of Avanzia, reviewed by the management and presented to the Board of Directors for approval.
- Quarterly ICAAP and ILAAP assessment and reporting by the management of Avanzia (ICAAP and ILAAP Report). The assessment is based on an ongoing risk monitoring, including stress testing, as well as the actual development of Avanzia, thereby providing a continuously updated ICAAP and ILAAP assessments. Through the quarterly process, the management ensures that the coverage of risks remains comprehensive and that the amount, the types and the distribution of internal capital and liquidity buffers are appropriate to effectively mitigate risks during normal and stressed conditions. The ICAAP and ILAAP Report also includes statements on current and future capital and liquidity adequacy.
- Ongoing risk management process and assessment by the management of Avanzia, which is reported to the Board of Directors of Avanzia on a regular basis.
- Supervisory Review and Evaluation Process (SREP) with the CSSF, followed up on the initiative of the regulator by a structured dialogue which may contain prudential measures.

The ICAAP and ILAAP framework consists of three major parts:

- Identifying, measuring, managing and reporting risks to which Avanzia is exposed. By following these processes, Avanzia is able to control the risks and assess internal capital needs and adequate liquidity buffers.
- Capital planning and capital management which ensures the Bank's capital adequacy on a continuous basis.
- Funding planning ensuring adequate liquidity and funding risk management.

To assess the internal capital and liquidity adequacy, Avanzia goes through a process of three main stages: risk identification, risk measurement and the assessment of internal capital needs and adequate liquidity buffers.

Risks assessed in the ICAAP and ILAAP are identified by the Bank as existing or potential risks that the Bank faces or could be facing. It also needs to reflect the economic and regulatory environment in which Avanzia operates or could operate, taking into account possible planned activity expansion. Department heads are responsible for identifying all risk areas in their area of responsibility in cooperation with the CRO.

Risks described in the ICAAP and ILAAP are the risks to which Avanzia is currently exposed to or is probable to be exposed to in the future. The inventory of risks is reviewed during the yearly ICAAP and ILAAP process in cooperation with all functions within the Bank and could be expanded if new risks are identified. The risks currently identified by Avanzia are reported on a regular basis.

### 4.3 Risk overview

The table below summarises the ICAAP and ILAAP relevant risks and how they are categorised:

Risk type	Control methodology
Credit risk	Covered by Pillar I capital requirement (using standardised approach) Integration in stress scenarios Internal control measures Regular monitoring and reporting
Liquidity risk	Underlying with internal own funds in the ICAAP case ILAAP stress testing Internal control measures Regular monitoring and reporting
Operational risks	Covered by Pillar I capital requirement (using alternative standardised approach) Pillar I capital sufficiency assessed through value-at-risk quantification Internal control measures Regular monitoring and reporting
Concentration risks	Internal control measures
Systemic risk	Internal control measures
External fraud risk	Internal control measures Regular monitoring and reporting
Counterparty risk - Financial institutions	Internal control measures Regular monitoring and reporting
Country risk (transfer)	Internal control measures
Foreign exchange risk	Not considered significant
IRRBB risk	Underlying with internal own funds in the ICAAP case Integration in stress scenarios Internal control measures Regular monitoring and reporting
Model risk	Internal control measures Regular monitoring and reporting
Income risk	Deductible from internal own funds in the ICAAP case Internal control measures Integration in stress scenarios
Reputation risk	Internal control measures
Regulatory compliance risk	Internal control measures
Money laundering and terrorist financing risk	Internal control measures
Outsourcing risk	Internal control measures
IT Risk	Internal control measures
ESG risks	Not considered significant

Please note that further information on the identified risks, related capital requirements and risk management techniques are provided in Section 6 below.

## 5 CAPITAL BUFFERS (ART. 440 CRR)

According to Article 440 (1)(a) and (b) the Bank has to disclose its compliance with the requirement for a countercyclical buffer referred to in Title VII, Chapter 4 of EU 2013/36. The Bank considered the provisions under Commission Delegated Regulation 2015/1555 for disclosures purposes. As shown below, the Bank must apply a countercyclical capital buffer of 0% for each country exposure except Luxembourg, Great Britain, France and Germany.

### Geographical distribution of credit exposures relevant for the calculation of the countercyclical capital buffer

Breakdown by country (in MEUR)	General Credit Exposures		Trading Book Exposure		Securitisati on Exposure		Own Funds Requirements			Own funds requirement weights	Counter cyclical capital buffer rate	
	Exposure value for SA	Exposure value IRB	Sum of long and short position of trading book	Value of trading book exposure for internal models	Exposure value for SA	Exposure value for IRB	Of which: General credit exposures	Of which: Trading book exposures	Of which: Securitisation exposures			Total
Austria	93.58						7.49			7.49	4%	0%
Belgium	7.92						0.63			0.63	0%	0%
Bahamas	0.32						0.03			0.03	0%	0%
Switzerland	1.36						0.1			0.1	0%	0%
Germany	1 782.37						142.59			142.59	84%	0.8%
Spain	57.37						4.59			4.59	3%	0%
France	95.50						7.64			7.64	5%	0.5%
Great Britain	0.53						0.04			0.04	0%	2%
Guernsey	0.16						0.01			0.01	0%	0%
Gibraltar	0.24						0.02			0.02	0%	0%
Italy	14.38						1.2			1.2	1%	0%
Cayman Islands	0.02						0.0			0.0	0%	0%
Liechtenstein	0.05						0.0			0.0	0%	0%
Luxembourg	69.80						5.58			5.58	3%	0.5%
Monaco	5.80						0.46			0.46	0%	0%
<b>Total</b>	<b>2 129.4</b>						<b>170.4</b>			<b>170.4</b>	<b>100%</b>	<b>3.8%</b>

The institution-specific countercyclical buffer for Advanzia is at 0.67%.

Amount (in MEUR)

Total risk exposure amount	2 268.2
Institution specific countercyclical buffer rate	0.67%
Institution specific countercyclical buffer requirement	15.1

## 6 INVENTORY OF RISKS

### 6.1 Credit risk (Art. 442 of CRR)

#### 6.1.1 Credit risk management framework

Credit risk is the risk of financial loss to the Bank if a customer or counterparty to a financial instrument fails to meet its contractual obligations. Given the inherent nature of the Bank's operations that is focused on unsecured consumer lending, credit risk represents the largest single risk factor for the Bank. It arises principally from the Bank's loans and advances to customers and other banks and investment debt securities. Delinquencies and loan losses are on a stable trend due to maturing portfolio and ongoing improvements in credit scoring models used by Advanzia. This stability can also be attributed to the extensive efforts of Advanzia to keep credit risk under control. Various policies, procedures and routines have been developed through the years and are under constant scrutiny to be able to predict customer behaviour and react to unexpected changes when it comes to how much credit risk Advanzia is willing to take.

The Bank's risk strategy regarding credit risk is to reach an appropriate balance between risk and reward that maximises long-term value creation. This is achieved by applying several scorecards at application, and later based on behaviour, and using this to determine probability of default and to assign the appropriate credit limit for the individual customer.

The Bank laid down a Credit Policy, approved by the Board of Directors, which is based on actively managing the financial risk exposure by restricting the credit limits to high-risk clients, and assigning relatively small credit lines to a diversified spectrum of customers. The Credit Risk Committee is responsible for establishing the necessary procedures and routines in line with the Credit Policy in order to ensure systematic analysis and monitoring of the Bank's credit risk. The Credit Risk Committee is also responsible for implementing necessary corrective actions if needed, as the Credit Policy is constantly under scrutiny.

The Board of Directors has delegated responsibility for the oversight of credit risk to the Executive Management Committee, which further has delegated the responsibility to the Credit Risk Committee responsible for surveying and assessing credit risk. A Risk Modelling function, reporting to the Credit Risk Committee, is responsible for managing the Bank's credit risk, including:

- Formulating credit policies in consultation with business units, covering collateral requirements, credit assessment, risk grading and reporting, documentary and legal procedures, and compliance with regulatory and statutory requirements.
- Reviewing and assessing credit risk. The Bank assesses all credit exposures in excess of designated limits, prior to facilities being committed to customers by the business unit concerned. Ongoing credit risk monitoring of single customers and portfolio quality and adherence to internal limits, ensuring timely

reaction on the early warning signs and proactive definition of adequate measures for the prevention of losses.

- Providing advice, guidance and specialist skills to other units in the Bank to promote best practice throughout the Bank in the management of credit risk.
- Continuous and comprehensive portfolio analysis, analysis of trends and recommendations to ensure long term sustainability of the Bank and its business.

For risk management reporting purposes, the Bank considers and consolidates all elements of credit risk exposure (such as individual obligor default risk, country and sector risk).

### 6.1.2 Capital requirements for credit risk

As at 31 December 2023, Pillar I capital requirements for credit risk amounted to EUR 276.8 million<sup>2</sup>. Under the standardised approach, the Bank's exposures to credit institutions qualify for a 20% risk weighting, the exposures to credit card clients are subject to a 75% risk weighting, except the net exposures to clients 90 days or more past due, which are subject to a 100% risk weighting. Please refer to section Capital Requirements above for further details.

Credit risk is monitored very closely. Once a month, credit risk key performance indicators are reported to the Credit Risk Committee (CRC) and in case there is a slightest deviation (apart from seasonal and expected monthly variations), the root cause is urgently analysed and solved accordingly. In addition, the effect of every decision made by the Bank that has impact on credit risk is also monitored closely and reported to the CRC. Hence, whenever an expected or unexpected change in credit risk KPIs occurs, the Bank can quickly react and adjust respectively.

Therefore, Advanzia considers that the capital required for Pillar I is sufficient and does not consider additional Pillar II capital requirements.

In addition to the above, the Bank had at balance sheet date through the credit cards issued entered into undrawn commitment of EUR 6 513 million (2022: EUR 5 813 million) with its credit card clients being neither past due nor impaired.

#### 6.1.4 Non-performing and forborne exposures

Non-performing exposures are defined material exposures which are more than 90 days past due or the debtor is assessed as unlikely to pay its credit obligations in full without realisation of collateral, regardless of the existence of any past due amount or of the number of days past due.

The Bank does not undertake forbearance activities on its credit card portfolio, as cards on accounts being past due are blocked from usage, and that the contract for delinquent (more than 90 days past due) accounts are usually cancelled, become payable in full and sent for recovery or sold to a debt collection agency. An impairment allowance is also applied to all delinquent accounts.

(in MEUR)	Gross carrying amount/nominal amount of exposures with forbearance measures			Accumulated impairment, accumulated negative changes in fair value due to credit risk and provisions		Collateral received and financial guarantees received on forborne exposures

Concerning collateral obtained by taking possession and execution processes, the Bank does not hold instruments that were cancelled in exchange for collateral obtained by taking possession and on the value of the collateral.

### 6.1.5 Past due and impaired exposures (Art. 442 of CRR)

The Bank has divided its portfolio into different segments that have different sizes and risk profiles and adapts the ECL calculation on each of them.

For the credit card portfolio, the Bank developed specific models (PD, EAD, LGD models). For other segments (PCS and Nostro), the ECL calculation is based on an intermediate or basic approach, which consists of interpretation of historical data or on the use of external data.

#### *Expected credit loss and its components*

The expected credit loss is applicable to all financial instruments and is composed of the three components: the probability of default (PD), exposure at default (EAD) and the loss given default (LGD), all adjusted to take into account macro-economic scenarios. Expected Credit Loss (ECL) is the multiplication of those three components.

#### *Probability of default (PD)*

The PD of a loan is derived from a statistical model relying on internally compiled data comprising both quantitative and qualitative factors. Different statistical models have been developed for homogenous subsets of the Bank's credit card portfolio.

#### *Loss given default (LGD)*

Based on historical recovery data of defaulted loans, the Bank models the expected LGD. The recovery rate is calculated on a discounted cash flow basis, net from recovery costs, using the effective interest rate as the discounting factor.

#### *Exposure at default (EAD)*

Exposure at default represents the exposure that an instrument has at the time of default. Undrawn commitments are reflected in EAD model based on historical information.

#### *Three-stage deterioration model & allocation*

A financial asset is at initial recognition allocated to stage 1. At each reporting date it is newly evaluated whether it can remain in stage 1 or whether transitioning to stage 2 is required because of a significant increase in relative credit risk (SICR) since initial recognition. If the instrument defaults, then it is transitioned to stage 3.

Any financial instrument at initial recognition is allocated to stage 1. Since Advanzia does not invest in credit impaired loans, all newly issued credit cards are allocated to stage 1 at initial recognition. As long as the risk of this instrument to default has not increased significantly by the next reporting date, the loan can be considered as performing and it stays in stage 1.

In case the credit risk of an instrument has increased significantly (SICR) after initial recognition by the next reporting date, the instrument is transitioned from stage 1 to stage 2. The Bank utilises default probabilities evolution, delinquency status and external ratings as the primary information to identify SICR.

In case an instrument defaults, it is transitioned to stage 3. For such non-performing loans, interest is no longer recognised on a gross, but net basis. The majority of the Bank's financial assets will move to stage 3

from stage 2, (e.g., loan first gets into in arrears before defaulting). Transition from stage 1 to stage 3 is unlikely, but possible (e.g., insolvency before the loan gets into in arrears). The Bank considers a financial asset to be in default (stage 3) when the loan is more than 90 days past due and/or the loan has been credit revoked.

#### *Forward-looking information*

Under IFRS 9, the Bank incorporates forward-looking information into its ECL measurement. A statistical model depending on external key leading indicators has been deployed to estimate the future development of PD, EAD, and LGD.

For loans and advances to financial institutions and central banks, external benchmark information is used (e.g., external credit assessment institutions for PD) to supplement the internally available information.

#### *Credit risk adjusted exposure*

The following table provides an overview of the Bank's exposures by classes and the related credit risk adjustments.

Credit quality of exposures by exposure classes and instruments  (in MEUR)	Gross carrying values of		Specific credit risk adjustment (c)	General credit risk adjustment (d)	Accumulated write-offs (e)	Credit risk adjustment charges of the period (f)	Net values

### 6.1.7 Use of ECAs (Art. 444 CRR)

Avanzia is using ratings of the following external credit assessment institutions certified in accordance with regulation (EC) No 1060/2009:

- Moody's
- Standard & Poor's
- Fitch

The Bank uses those ratings to assess its credit risk in relation to its loans to financial institutions. The selection of the financial institutions with whom the Bank establishes business are approved by the Board of Directors. These banks have minimum requirements with respect to ratings and are usually considered to be "systemic banks". As of 31 December 2023, all banking counterparties are eligible for Credit Quality Step (CQS) 1, hence for a 20% risk-weight.

Table below presents a mapping of CQS along with rating of the three used ECAs under the provisions of Commission Implementing Regulation 2018/634:

Credit quality step	1	2	3	4	5	6
<b>Fitch Ratings</b>						
Long-term issuer credit ratings scale	AAA, AA	A	BBB	BB	B	CCC, CC, C, RD, D

## 6.2 Counterparty risk

The Finance Policy of Advanzia stipulates maximum exposures with counterparties, which must be considered at a group level. As per applicable regulations, the sum of all placements with a single counterparty must not exceed the lesser amount of 100% of eligible capital or EUR 150 million, or 25% of eligible capital once the latter exceeds EUR 600 million. Central banks and governments are exempt from this limitation. The Credit Policy defines the acceptance criteria for counterparties as well as their subsequent monitoring.

All significant counterparties have been individually selected and approved by the Board of Directors. These banks, located in Western and Northern Europe, have minimum requirements with respect to ratings, and are usually considered to be "systemic banks". When placing funds with banks, Advanzia also considers the overall financial solidity and capacity of the country in which the banks are located and assesses concentration risk in that respect.

The counterparties are continuously monitored by Advanzia, and the updated exposure is presented on a monthly basis to the Credit Risk Committee. At least once a year, the Bank's counterparties are reviewed, and the findings are provided to the Board of Directors.

Advanzia considers that no additional ICAAP requirements should be set aside for this risk. The reason is that the probability of default is considered to be very low.

Both significant and smaller counterparties are subject to monthly monitoring as described in the Counterparty Monitoring Procedure. The monitoring covers the ratings of the counterparties, the amounts

placed with each counterparty, the exposure, and any other information that the Bank may receive from various sources. The relevant monitoring is provided to the Credit Risk Committee. More frequent reporting may be required in the event of distress.

### **6.3 Concentration risk**

#### *Credit card loans*

Avanzia's loans are small in size (on average approx. EUR 1 700 for active clients in good standing), maximum EUR 10 000, with credit limits above EUR 6 000 issued under strict policy rules and eligibility criteria. The loans are given to a large number of clients (in total above 2 400 000 credit cards in force of which more than 1 500 000 are active and in good standing). These clients are private individuals residing in Germany, Luxembourg, Austria, France, Spain and Italy. For Germany, the geographical representation of the Bank follows closely the overall German population distribution with customers from both genders, covering all age groups, distributed across several socio-economic groups.

#### *Placement with other credit institutions*

In its Credit Policy and Counterparty Monitoring Procedure, Avanzia has established limits on the amounts placed with other credit institutions, which are to be considered on a group level basis. The Bank also considers any country concentration risk in relation to the correspondent bank with which it places its funds.

#### *Country concentration risk*

Avanzia may be considered to have some country concentration risk, as most of its exposure is towards Germany. The German economy is however arguably one of the strongest economies in the world, and a large and well diversified country. Avanzia foresees that this risk will be reduced as the Bank is increasing its sales of credit cards in the other markets it is currently operating.

#### *Supplier/provider concentration risk*

Avanzia is using a set of suppliers/providers to deliver its outsourced services. None of these are interrelated to an extent that Avanzia considers that there is any relevant risk.

### **6.4 Model risk**

In Avanzia, decision-making regarding applicant eligibility for a credit card as well as its credit limit both during the application process and throughout the lifecycle of a customer are heavily dependent on credit scoring models. The models are designed to predict the probability of default or, in a more general sense, the probability of a customer developing a delinquency status such that the Bank would have not booked the account initially had it known such development would occur. When acquiring accounts, Avanzia builds its models on a static sample of accounts for which application, demographic and – whenever possible – credit bureau information is available. To support active credit limit management over time, Avanzia combines the static information acquired during the application process with dynamic behavioural data collected after a customer has become active.

Model risk occurs when the decisions (e.g., in assessments and valuations) made by Avanzia result in financial losses due to model deficiencies. The underlying primary cause of model errors is not necessarily

negligence, but knowledge limits, insufficient data, or changes which cannot be predicted from historic data, or simply the fact that models are never perfect.

The models employed by Advanzia are based on known principles and models, as well as the staff's experience and knowledge gained through professional activities.

A rigorous model management framework, governed by the Model Risk Management Policy, is set in place to ensure the quality of Advanzia's models as well as their proper validation and thorough monitoring. The framework establishes that:

- During the development stage of a model, all data undergoes quality testing, and any approximations are fully documented. Appropriate testing procedures account for accuracy, robustness and stability of the models.
- All models go through a comprehensive validation process by an expert validator from the Risk Control function who is independent from the model development. Furthermore, all models require approval by the Credit Risk Committee prior to being implemented.
- All models are documented at a level of details for a third party to understand the operation, limitations and key assumptions of the models.
- After approval and implementation, all models are monitored monthly using several statistical metrics to account for model discrimination and stability.

A rigorous process which every model developed by Advanzia goes through and a continuous monitoring with the ability to correct model defects or recreate a model from scratch as soon as model deficiencies are observed, provides a solid risk mitigation strategy. Due to the ability to react to changes in the models quickly, Advanzia has been able to obtain stability and prudence in its models, not underestimating the probability of default of its customers. Hence, the model risk as defined by Advanzia has been decreasing in recent years in correlation with the improvements made in its models. Moreover, Advanzia has implemented automatic credit risk model monitoring which is thoroughly reviewed each month by the Risk Modelling and Risk Control functions and reported to the Credit Risk Committee on a quarterly basis.

Model risk in the particular case of Advanzia is strongly connected to the credit risk as the decision-making for credit assignment is heavily based on credit scoring models.

## **6.5 Market risk (Art. 445 CRR)**

### **6.5.1 Market risk management framework**

Market risks are the risks that changes in market prices, such as interest rates, equity prices, foreign exchange rates and credit spreads (not relating to changes in the obligor's/issuer's credit standing) will affect the Bank's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return on risk.

Overall authority for market risks is vested in the Finance Department, which is responsible for the development of market risk management policies (subject to review and approval by the Board of Directors) and for the day-to-day review of their implementation. As the Bank has no trading portfolio, there is no

market risk associated with this. The Bank has been entitled by the CSSF to calculate a simplified solvency ratio and does not reserve capital for exposure to market risk under Pillar I requirements.

### 6.5.2 Interest rate risk (Art. 448 of CRR)

Under any circumstance, credit card loans and client deposits are usually not subject to sudden large (but short-lived) aberrations which may occur in the underlying money market interest rates, and the Bank is thus in practice shielded from such shocks. The Bank also has placements with other banks, either on nostro accounts or as term deposits, but the duration of the latter is usually kept at less than three to six months and are thus considered to be in line with the main other interest-bearing asset/liability classes.

The Bank monitors and reports interest rate risk and its impact on both the Net Interest Income (NII) and the Economic Value of the Equity (EVE).

By the nature of its activities, Advanzia's exposure to interest rate risk is rather limited:

- Advanzia has a straightforward business model: the Bank issues unsecured credit card loans that are mainly financed by deposits from retail clients. As a consequence, Advanzia has a simple product set made of interest-bearing assets and liabilities. The impact of this risk is fairly limited due to the comfortable net interest margin of the Bank.
- The applicable rates on the credit cards are typically more driven by legal constraints (usury regime) than by changes in the underlying rate. The former can thus be considered as "sticky" and rigid.
- Advanzia is a rather small local player mainly present in Germany, as well as in other Western European countries (Luxembourg, France, Austria, Spain and Italy).

The computation of all interest stress models (sensitivity on economic value, sensitivity on income and gap analysis) is performed on a quarterly basis. In case of increased interest rate volatility or increased IRRBB levels, monitoring of exposure to IRRBB might be performed more frequently.

For the ICAAP assessment, interest rate risk is modelled as the cost incurred by Advanzia in case of an increase of market reference rates, based on historical data, not reflected in credit card interest rates. Such an increase would have an immediate impact on deposit rates and would decrease the net interest margin before the credit card rate would adjust.

### 6.5.3 Foreign exchange risk

The Bank at the outset conducts all of its operations in Euro. This applies to credit card transactions (card transactions in other currencies are converted by Mastercard to Euro before they are presented to the Bank), deposit accounts and operations. There may be some suppliers that may require settlements in other currencies, but these are expected to be marginal.

Furthermore, due to the Bank's Cards-as-a-Service (CaaS) business (turnkey credit card solutions for private banks and financial institutions), foreign exchange positions will arise from revenue streams in other currencies which shall be unwound regularly, but at the latest when the net position in a given foreign currency exceeds the higher of EUR 500 000 or 0.25% of the Bank's Tier 1 Capital in EUR equivalent. For all currencies combined, the total exposure may not exceed EUR 1 000 000 or 0.50% of the Bank's Tier 1 Capital in EUR equivalent.

The Bank may exceptionally also have assets or liabilities in other currencies if this is necessary or particularly beneficial. Such exposures must be adequately hedged and approved by the Board of Directors. If needed, the Bank may undertake operations or purchase instruments in order to hedge currency risk.

Only a non-significant part of Advanzia's banking book assets and liabilities lie in a foreign currency. The Bank is hedging all relevant foreign currency positions and is monitoring them on a regular basis, so that the net foreign currency position and the associated risk is negligible.

## 6.6 Operational risk (Art. 446 CRR)

Operational risk can broadly be defined as the risk of direct or indirect loss resulting from inadequate or failed internal processes, systems and people intervention, or from external events. This definition includes legal risk but excludes credit risk, market risk, liquidity risk, strategic risk, compliance risk and external fraud risk. Due to the specific nature of the Bank's business model (credit card operations), external fraud risk has been considered as a separate risk category with adequate assessment and monitoring procedures.

The Bank considers operational risk events resulting in operational risk loss: if it occurs, it causes direct or indirect losses in the form of financial loss or reputational loss respectively.

The Bank's operational risk management focuses on proactive measures in order to ensure business continuity, accuracy of information used internally and reported externally and a competent and well-informed staff. The operational risk management ensures adherence to established rules and procedures as well as on security arrangements to protect the physical and information and communications technology (ICT) infrastructure of the Bank.

A representative selection of different operational risk types included in this context is:

- **People:** may include internal fraud, breaches of employment law, unauthorised activity, key person risk, inadequate training or supervision.
- **Processes:** failures in payment or settlement, deficient documentation, valuation errors, project management failures, internal or external reporting problems and missing reconciliation.
- **Systems:** typically, this would include system failures, errors in system development and implementation, and inadequate IT resources.
- **External events:** these would include, amongst others, crime and outsourcing.

The Bank has established policies, procedures, routines and guidelines documenting most aspects of the Bank, as well as describing the operating of the Bank. These are constantly being reviewed, and the management is updating the applicable documents, as this is required due to internal requirements or changes in governing regulations, etc.

The Bank has also established several internal business continuity plans and disaster recovery plans for its internal organisation, to ensure the on-going operations for the Bank, even if negative events occur that could affect the Bank. These are in accordance with external regulations requirements and do, in the Bank's view, mitigate the risks in a satisfactory manner. These plans are also being developed further as Advanzia is growing in size and complexity.

The Bank uses risk control self-assessments (RCSAs) in order to assess and quantify (potential) operational risks (e.g., in terms of likelihood and severity/impact) and to ensure that appropriate means and resources

can be identified and allocated to the management of the identified risks. Risk assessments also serve to determine the appropriate capital requirements for operational risk.

RCSAs are performed by all functions within the Bank and are challenged by the Risk Control function. The frequency of the RCSAs follows a risk-based approach and is carried out at least annually, or if there are significant changes in systems, processes or staffing arrangements affecting such exposure. A materiality assessment is conducted for all identified risks based on both the likelihood of the risk materialising and the severity of the impact.

Risk reporting is an essential component of operational risk management ensures that it is embedded in the organisation and the risk exposures are proactively managed. Reporting must share a transparent view of the risk profile to provide an accurate, timely and clear account of the current and projected risk exposure.

All operational risk incidents are reported to the Risk Control function via its incident and operational risk event management tool. Incidents which are based on operational risks will be reported on a quarterly basis during the Security Committee or directly to the ManCom depending on the impact.

Avanzia Bank S.A. has received acceptance from the regulator for using the Alternative Standardised Approach (ASA) as described in the Basel 2 framework as well as Regulation (EU) N° 575/2013 for assessing operational risk charge for capital adequacy purposes. The amount assessed for this charge as at balance sheet date was MEUR 11.1 when using the ASA method.

The Bank implemented a value-at-risk quantification for all material operational risks. As the results of this economic capital assessment are below the Pillar 1 requirements for operational risk, the Bank chooses to adopt the Pillar 1 figure for the Pillar 2 capital assessment. No additional liquidity buffers are allocated to operational risks.

### 6.6.1 Disaster recovery plan/business continuity plan

For the purpose of a disaster recovery and the planning of the business continuity, a Business Continuity Management (BCM) framework is established on Board of Directors and Management Committee levels. The BCM framework layouts requirements and practices for planning, preparedness, organisation, and activities to be considered in crisis and emergency situations. Different disaster and crisis invoking events are covered, such as the long-term failure of the IT systems or disruption of the communication channels. The Bank has technology recovery plans in place which are reviewed and tested by the IT department at least annually. The Bank conducts business impact assessment regularly to identify continuity risks, critical processes, and to classify supporting technology.

## 6.7 Outsourcing risk

Avanzia is purchasing services from external service providers. The risks associated with this practice are related to the fact that suppliers will not provide the agreed deliveries, or that the quality may be insufficient. The consequence is that tasks may not be performed.

To mitigate these risks, Avanzia has established a set of internal rules when buying services from external suppliers. The Procurement and Outsourcing Procedure of Avanzia regulates the conditions and requirements for outsourcing operations of the Bank. In no way can outsourcing remove or lessen the

responsibility Advanzia holds towards its customers, authorities or other entities in relation to the fulfilment of governing laws and regulations, such as data protection regulations and/or consumer law.

The executive management in Advanzia is responsible for keeping the Board of Directors duly informed about all important aspects related to the decision of outsourcing, procurement and supply management.

In order to cover all contractual aspects of outsourced services, Advanzia has a Procurement function in place.

## **6.8 Systemic risk**

Systemic risk or macroeconomic risk is defined here as the increase in the probability that the overall economy will develop negatively, and its consequences on the Bank's portfolio.

Advanzia is mainly exposed to Germany (80% of the gross card loan balance), whereas the exposure to Luxembourg, France, Austria, Spain and Italy remains limited.

Nevertheless, since Advanzia's main operations are to some extent cyclical, and given that in the longer run, the economic development could eventually start to abate, the Bank must be able to address and mitigate a change in this risk. The Bank is addressing and mitigating this risk in the following ways:

- Adjusting the credit limits of existing clients down (Advanzia has the contractual right to do this).
- Adjusting for growth expectations: Implying that Advanzia can easily reduce its ambitions with respect to growth in terms of client acquisition and credit limit increases. This reduces credit risk, and also allows for decreased operational costs (in particular client acquisition costs).

## **6.9 External fraud risk**

Fraud in the context of credit card operations is defined as the fraud committed by Advanzia's clients or other parties outside the Bank. The distinction between when the Bank is subject to either intentional application fraud or delinquent transaction behaviour is not always clear, but Advanzia records a certain set of incident categories as fraud.

The application- and transaction fraud prevention actions are covered by the Fraud Prevention Procedure as well as by several routines.

The Application Fraud Prevention and Transaction Fraud Prevention functions of the Bank has implemented various measures both on the application as well as on the transaction fraud sides.

The Fraud Prevention function is constantly reviewing the existing application fraud prevention measures and is continually investigating further potential enhancements towards even more advanced fraud identification techniques.

Transaction fraud losses are reported to the management on a monthly basis. In addition, transaction fraud is reported to the BCL monthly.

## **6.10 Regulatory compliance risk**

Compliance risk for Advanzia includes but is not limited to the risk of breaches of ethical rules, legal and regulatory risk, reputation risk, litigation risk and risk of sanctions.

The Compliance function's role is to anticipate, identify, assess, mitigate and manage compliance risks and assist the Bank's management in preventing and limiting these risks on an ongoing basis. In particular, the Compliance function must ensure that the Bank's activities comply at all times with the applicable laws and regulations and remain within the compliance risk limits set by the Board of Directors.

The Chief Compliance Officer (CCO), also acting as the person responsible for compliance with the AML/CFT obligations ("RR"), as a member of the authorized management of the Bank is responsible for the Compliance function within Advanzia. The Compliance function, responsible for the implementation of compliance policies, procedures, processes and for the execution of the second line of defence controls, is overseen by the Head of Compliance.

Whilst the products and operations of Advanzia are highly standardised and the complexity is reduced, the Bank operates in several jurisdictions. The Bank has to ensure ongoing compliance with the standards applicable in those jurisdictions, where applicable, and to anticipate changes that may have legal or regulatory impact(s) on its products and services. Thus, the Compliance function is by default involved in the set-up of new products and markets.

The Bank has implemented a regulatory compliance process described in the Regulatory Compliance procedure. This process includes a regulatory watch tool to support the Compliance function in the identification and assessment of key legal and regulatory changes impacting the Bank. In addition, a Compliance Risk Assessment (CRA) has been developed by the Compliance function with the purpose of identifying, assessing, and classifying the compliance risks to which the Bank is exposed in the conduct of its activities.

Advanzia places high emphasis on proper implementation of policies, procedures, processes and internal controls, so that these are compliant with the applicable regulatory framework. Most of the processes are either automated or highly standardised, thereby reducing the risk of non-compliance due to human error or intentional misconduct.

Furthermore, the Bank has set up a Compliance Monitoring Plan (CMP) to prevent, monitor and manage compliance risks identified in the CRA. The purpose of the CMP is to ensure that compliance risks are appropriately covered and mitigated within the Bank, and that first line of defence controls are adequate and sufficient to address those risks.

To guarantee the steering of compliance within the Bank, the Compliance function has set up a Legal & Compliance Committee, whose members are responsible for maintaining a communication line with the Compliance function.

The scope and responsibilities of the committee, as laid down in its terms of reference, have been designed with the objective to increase the effectiveness of the Bank's regulatory compliance framework and, *inter alia*, includes the following key responsibilities: regulatory watch, legal and compliance updates, maintenance and oversight of the compliance action plan and compliance error log as well as approval of changes to the Bank's country risk list.

This committee ensures that the Bank is informed of forthcoming legal and regulatory changes and allows the Compliance function to centralise information on any potential issues or breaches. It also serves as a platform for discussing and addressing all compliance-related issues that may have an impact on other departments.

Any breach is subject to appropriate measures and addressed without undue delay by the Bank. The Compliance function monitors through the Compliance Error Log that issues are appropriately addressed and resolved.

### **6.11 Money laundering and terrorist financing risk**

Money laundering (ML) is the illegal process of concealing the origins of money obtained illegally by passing it through a sequence of banking transfers or commercial transactions. The general pattern of this process is to send money back to the launderer in a way that is generally opaque and indirect.

All types of credit institutions accounts are vulnerable to terrorism financing as they can be used to access other financial products, they can be used to set up false customer profiles or to allow individuals to withdraw cash, and are vulnerable to misuse by third parties.

Terrorism financing (TF) is and will remain extremely difficult to detect for a number of reasons, in particular because the funds may come from legitimate activities, the time between an individual accessing funds and committing an attack or travelling to a conflict zone may be very short or that transactions are often of low value and indistinguishable from ordinary financial behaviour.

Avanzia assesses its exposure ML/TF on a yearly basis through the ML/TF risk assessment. This exercise, conducted in accordance with the CSSF Circular 11/529, aims at identifying and assessing the Bank's vulnerabilities with regard to ML/TF as well as assessing the effectiveness of its internal anti-money laundering (AML) and counter-terrorism financing (CTF) control framework.

The Bank's mitigation measures implemented to reduce ML/TF risk are defined in detail in its ML/TF Risk Assessment, AML/CTF Policy, AML/CTF Credit Card Procedure, AML/CTF Deposit Account Procedure, AML/CTF Professional Card Services Procedure and other relevant internal guidelines.

The Bank has also established an internal Country Risk List which is based on various sources and takes into consideration the FATF statements.

Moreover, Avanzia's AML/CTF compliance framework includes screening tools, based on name matching, and controls to detect politically exposed persons (PEPs) as well as persons subject to sanctions/embargos. In this regard, an internal process is in place to ensure that the alerts generated by the screening tool are adequately reviewed by the first line of defence and, where required, escalated to the Compliance function for further investigation.

## 6.12 Liquidity risk

One of Advanzia's main risks is liquidity risk. The risk arises from negative unforeseen cash flows from Advanzia's operations. Advanzia has the following sources of cash flows:

- Credit card turnover
- Repayments
- Operational payments
- Deposit accounts operations
- Other financial items

The Bank's risk management objectives and policies may be summarised as follows:

LRQua	Qualitative disclosures	Comment
	Strategies and processes in the management of the liquidity risk	Advanzia Bank S.A. has a liquidity risk management framework that supports a moderate risk profile and safeguards the Bank's reputation from a liquidity perspective. This framework must ensure that the Bank meets its payment obligations at a reasonable cost, even under severely adverse conditions. The Bank maintains a set of liquidity risk indicators to manage the liquidity position within the requirements set internally and by the regulator.
	Structure and organisation of the liquidity risk management function (authority, statute, other arrangements)	- The first LoD refers to the Payment Operations and Accounting functions which execute the daily business activities.
		- The second LoD refers to the Risk Control function which monitors and reports the risks associated with ALM and Treasury activities.
		- The third LoD refers to Internal Audit which provides assurance regarding the design and effectiveness of the governance structure, systems and processes of ALM, Treasury, Risk Control and Finance.
	Scope and nature of liquidity risk reporting and measurement systems	Advanzia Bank uses a comprehensive set of liquidity indicators to monitor and measure liquidity risk, both in business as usual (BaU) as well as in stressed conditions.
	Policies for hedging and mitigating the liquidity risk and strategies and processes for monitoring the continuing effectiveness of hedges and mitigants	Liquidity risks are mitigated by maintaining a sufficiently large liquidity buffer and sufficient diversification of funding sources to ensure access to liquidity at any point in time.
		A contingency plan is put in place that prepares the Bank for a potential liquidity stress event. The contingency plan provides guidelines to manage a range of stress environments and describes the lines of responsibility, escalation procedures and mitigating actions.

The Bank monitors and reports the Liquidity Coverage Ratio (LCR) and the Net Stable Funding Ratio (NSFR) on a continuous basis. Those ratios, along with an analysis of the Bank's liquidity and liquidity stress tests are detailed in the ICAAP and ILAAP framework and in a Liquidity Report presented to the Asset & Liability Committee (ALCO). LCR and NSFR are calculated as defined in the Capital requirements regulation and directive. The evolution of both ratios for the year 2023 is presented in the following table:

(in MEUR)	2023-Q1	2023-Q2	2023-Q3	2023-Q4
<b>Liquidity Coverage Ratio (Min. 100%)</b>	<b>152.85%</b>	<b>205.86%</b>	<b>201.76%</b>	<b>229.82%</b>
HQLA	582.4	889.8	931.9	1 129.8
Net cash flow amount	381.0	432.2	461.9	491.6
<b>Net Stable Funding Ratio (Min. 100%)</b>	<b>242.37%</b>	<b>260.55%</b>	<b>250.44%</b>	<b>214.00%</b>
Available Stable Funding	3 026.7	3 393.0	3 410.3	3 706.9
Required Stable Funding	1 248.8	1 302.2	1 361.7	1 732.2

During the year, the Bank has exceeded the LCR and NSFR regulatory requirements of 100% at all times.

Avanzia is continuously monitoring stress test scenarios. These are based on the largest deviances the Bank has ever experienced historically on the most important cash flows (turnover, repayments, deposit). Furthermore, stress testing for the main liquidity drivers, as well as a combination of all negative effects occurring simultaneously is performed. The likelihood of all events occurring simultaneously and without Avanzia not implementing any counteractions (i.e., increase interest rate on deposit accounts, stop credit limit increases and sales, block open credit cards) is considered highly remote.

In addition, the Bank could also stop credit limit increases on credit cards, not issue any new cards, not spend money on marketing, and thereby improve the liquidity situation even further. Avanzia's Recovery Plan is detailing this further.

In the quarterly ICAAP and ILAAP report, the liquidity situation of the Bank is assessed from economic and normative perspectives. The assessment includes a baseline scenario and two adverse scenarios (severe economic downturn and going concern scenarios) in line with the overall planning objectives of the Bank. Additionally, Avanzia performs a reverse stress test for liquidity risk, which considers maximum outflows from deposit accounts that the Bank could handle in order to remain LCR compliant in terms of regulatory requirements and risk appetite.

### 6.13 Income risk

There is a risk that Avanzia's income may change over time. There may be several sources for this risk, such as change in client behaviour, increase in funding costs, decrease in interest rates, etc. Avanzia's business model, however, is one of highly stable recurring revenue. The contribution from each monthly vintage is both stable and predictable over time and contributes to maintain the income risk at low levels.

Overall, the Bank foresees two potential scenarios that could affect its income to a significant extent: an increase of the funding costs (increase in the deposit rates) or a decrease of the credit card yield.

The Bank assumes that the scenario of an increase in deposit rates is already covered in the liquidity risk section; and the scenario of a decrease in credit card yield is covered under interest rate risk. Both scenarios are covered in the ICAAP and ILAAP assessment. Income risk *per se* is further assessed in ICAAP and ILAAP using historical data on the deviation between budgeted and actual income.

### 6.14 Reputation risk

Reputation risk may arise from the Bank acting incompetently or dishonestly towards its clients, that it presents itself in an unprofessional fashion, and possibly also due to founded or unfounded smear

campaigns from others. Also, since the 2008 crisis and the rescue of the banking sector in many countries, the perception of the banking sector in general has clearly receded.

The Bank is subject to reputation risk, which is also considered for the ICAAP and ILAAP exercise. It is modelled here as an event that may give rise to liquidity risk, as the worst consequence of a negative reputation situation would clearly be large withdrawals of deposit account funds, or business risk as it may imply loss of income on the credit card side. It is therefore included in assessment of the other risks.

## 7 ASSET ENCUMBRANCE (ART. 443 CRR)

Some of the Bank's assets are encumbered. As of 31 December 2023, the carrying amounts for encumbered and unencumbered assets were as follows:

Encumbered assets (in MEUR)	Carrying amount of encumbered assets	Fair value of encumbered assets	Carrying amount of unencumbered assets	Fair value of unencumbered assets
Assets of the reporting institution	1 178.1		2 978.1	
Equity instruments				
Debt securities				
Other assets	1 178.1		2 978.1	

## 8 LEVERAGE RATIO (ART. 451 CRR)

The Leverage ratio of Advanzia is part of the Extended Corep and disclosed in report C47.00 that is reported on quarterly basis to the CSSF. As of 31 December 2023, the Leverage ratio was reported as follows.

LRSUM	(in MEUR)	Amount at Disclosure Date
<b>Summary reconciliation of accounting assets and leverage ratio exposures</b>		<b>Applicable Amounts</b>
1	Total assets (including off-balance sheet exposure)	10 666.3
2	Adjustment for entities which are consolidated for accounting purposes but are outside the scope of regulatory consolidation	
3	Adjustment for fiduciary assets recognised on the balance sheet pursuant to the applicable accounting framework but excluded from the leverage ratio exposure measure according to Article 429(11) of Regulation (EU) NO. 575/2013	
4	Adjustments for derivative financial instruments	
5	Adjustments for securities financing transactions (SFTs)	
6	Adjustment for off-balance sheet items (i.e. conversion to credit equivalent amounts of off-balance sheet exposures)	-5 862.2
EU-6a	(Adjustment for intragroup exposures excluded from the leverage ratio total exposure measure in accordance with Article 429(7) of Regulation (EU) No 575/2013	

EU-6b	(Adjustment for intragroup exposures excluded from the leverage ratio total exposure measure in accordance with Article 429(14) of Regulation (EU) No 575/2013	
7	Other adjustments	-18.6
<b>8</b>	<b>Leverage ratio total exposure measure</b>	<b>4 785.5</b>

LRCOM	(in MEUR)	Amount at Disclosure Date
-------	-----------	---------------------------

Leverage ratio common disclosure		CRR leverage ratio exposures
----------------------------------	--	------------------------------

On-balance sheet exposure (excluding derivatives and SFTs)		
--	--	--

1	On-balance sheet items (excluding derivatives and SFTs, but including collateral)	4 152.8
2	Asset amounts deducted in determining Tier 1 capital	-18.6

Leverage ratio was 8.04% as of 31 December 2023 (2022: 7.35%). The increase is driven by the growth of total exposure. Leverage ratio is monitored on a quarterly basis, and the management of the Bank takes relevant actions for this ratio to stay above the 3% requirement.

## 9 REMUNERATION POLICY (ART. 450 CRR)

### 9.1 Governance

#### *Board of Directors*

The Board of Directors of the Bank has approved a policy which establishes the principles for the remuneration expenditure for management and employees.

The Board agrees and approves the fixed remuneration within the individual employment contract of the Executive Management Committee (EMC). The Board – together with the Nomination and Remuneration Committee (NRC) – also determines the variable remuneration of the EMC and – together with the CEO – assesses the individual performance of the Management Committee.

Meetings of the Board of Directors are held 4 times per year.

#### *Nomination and Remuneration Committee (NRC)*

The NRC is composed of three members of the Board of Directors in its supervisory function. The NRC:

- is responsible for the approval of new hires of the category “material risk takers / identified staff”; as defined in the Remuneration Policy; the approval can be after the signature of an employment contract, in such case the employment contract is only valid under the condition of a subsequent approval by the NRC;
- is responsible for the preparation of decisions on remuneration to be approved by the BoD, in particular regarding the remuneration of the members of the EMC, the Management Committee (ManCom) and other Identified Staff;
- provides support and advice to the Board of Directors on the design of Advanzia’s Remuneration Policy (including that such policy is gender neutral and support the equal treatment of staff of different genders) and ensuring that Advanzia’s remuneration policy is still up to date;

- supports the Board of Directors in overseeing the remuneration policies, practices and processes and the compliance with the Bank's Remuneration Policy;
- reviews the appointment of external remuneration consultants that the Board of Directors may decide to engage for advice or support;
- ensures the adequacy of the information provided to shareholders on remuneration policies and practices, in particular on a proposed higher maximum level of the ratio between fixed and variable remuneration;
- assesses the mechanisms and systems adopted to ensure that the remuneration system properly takes into account all types of risks, liquidity and capital levels and that the overall Remuneration Policy is consistent with and promotes sound and effective risk management and is in line with the business strategy, objectives, corporate culture and values, risk culture and the long-term interest of the Bank;
- assesses the achievement of performance targets and the need for ex post risk adjustment, including the application of malus and clawback arrangements; and
- reviews a number of possible scenarios to test how the remuneration policies and practices react to external and internal events, and back-test the criteria used for determining the award and the ex-ante risk adjustment based on the actual risk outcomes.

#### *Executive Management Committee (EMC)*

The EMC agrees and approves the fixed remuneration within the individual employment contracts for the other members of the Management Committee.

#### *Management Committee (ManCom)*

The ManCom and EMC agree and approve the fixed remuneration within the individual employment contracts for employees who belong to the higher categories referred to in Art. L. 162-8 of the Luxembourgish Labour Law (cadre).

## **9.2 Pay and performance**

Avanzia uses a set of Key Performance Indicators – (KPIs) to quantify and thereby assess the performance of the Bank (a combination of overall performance, business unit performance, market specific performance) in order to determine the bonus envelope by the NRC / BoD. In principle, the Bank uses a combination of KPIs, which are considered being short- and long-term value creating elements. The annual bonus targets under each of the KPIs will be determined by the BoD, together with the CEO, at the beginning of each bonus year. The target values of the KPIs may be different for EMC and ManCom compared to those applicable for employees.

The Bank also takes into account the current and future risks in the calculation of the variable remuneration. In this regard, in order to ensure that the variable remuneration awarded is fully aligned with the risks taken, the Bank can adjust the variable remuneration depending on the current risks and the risk indicators.

On the basis of the above, the BoD determines an overall bonus provision for the year as part of the annual budget process. The allocation of the individual bonuses for the employees is under the responsibility of the CEO. The individual bonus amounts for EMC, ManCom and other Identified Staff are approved by the BoD upon recommendation of the NRC.

The BoD will at its discretion decide on the voluntary and non-binding bonus program from year to year. The BoD may also modify and update the program and its components during the year, such as e.g. the performance criteria for the bonus program.

When setting the bonus envelope, the ratio between the variable and the fixed remuneration of each Identified Staff is taken into account (and includes all types of variable remuneration granted to this Identified Staff for one year), as well as the financial situation of the Bank, including its capital base and liquidity situation.

### *Objective setting process*

As part of the objective setting process the objectives for the whole company are defined by the BoD. These are based on the long-term strategy of the Bank, usually defined in a five-year planning. In a next step, the objectives are broken down to department level. The Managing Directors (i.e. the members of the ManCom), are assessed on these objectives in addition to individual objectives agreed together with the CEO of the company.

All employees will receive their individual objectives, which are based on the company's objectives – broken down to department / individual level, department objectives as defined by the department head, team objectives, which are defined on team level, and individual objectives. The nature of these objectives is always based on the individual role and responsibility. It includes financial objectives (only where appropriate and applicable) and non-financial objectives.

### *Performance Evaluation*

During the annual performance review process, all employees below ManCom level have a performance review meeting with their line manager, where their individual performance in the preceding year is assessed, based on a rating of general skills and their development and the assessment of their individual objectives.

A final grading will be allocated to each employee, ranging from C (unsatisfactory performance) to AAA (outstanding performance), where an "A" rating reflects a performance which fully meets the requirements.

A range for the individual bonus amount awarded is calculated based on the following:

- The overall budget available for bonus payments.
- The hierarchical level of an employee.
- The individual performance.

The exact bonus amount will be determined by each department head within the range provided as a result of the calculation above.

### *Identified Staff*

For the purpose of identification of the employees whose professional activities have a material impact on the Bank's risk profile ("Identified Staff"), Advanzia takes into consideration the Law and the qualitative and quantitative criteria set out by the Regulation and has identified the following (groups of) employees as Identified Staff:

- Executive Management Committee (EMC), as staff members in the management body in its management function;

- Management Committee (ManCom), as staff members in the management body in its management function;
- Head of Risk Control (Chief Risk Officer) as staff member with managerial responsibility over the institution's control function for the activities of the risk control function;
- Head of Compliance (Chief Compliance Officer), as staff member with managerial responsibility over the institution's control function for the activities of the compliance function and for the prevention of money laundering and terrorist financing;
- Head of Internal Audit (Chief Internal Auditor), as staff member with managerial responsibility over the institution's control function for the activities of the internal audit function;
- Head of Legal, as staff member with managerial responsibility over legal affairs;
- Head of Accounting & Regulatory Reporting, as staff member head of the function responsible for the soundness of accounting policies and procedures and taxation matters;
- Head of Analytics & Controlling, as staff member head of the function responsible for planning, budgeting and forecasting including capital needs and for performing economic analyses;
- Head of Corporate Finance, as staff member head of the function responsible for the Bank's capital and debt raising;
- Head of Human Resources, as staff member with managerial responsibility over human resources;
- Information Security Officer (ISO), as staff member with managerial responsibility over the "information security"
- Head of IT Service Delivery, as staff member head of the function responsible for information technology and
- BoD, as members of the management body in its supervisory function.

Based on Advanzia's business model and organisational structure, only the above-listed staff members should be considered as material risk takers because their functions could be performed in such a way to have an influence on the variable part of their remuneration and on the risk profile of Advanzia.

In order to keep the above list up to date, Advanzia conducts and documents annually self-assessments in order to identify all staff whose professional activities have or may have a material impact on the Bank's profile while ensuring that staff that fall or are likely to fall under the criteria established by the Law, as well as the qualitative and quantitative criteria set out by the Regulation for a period of at least three months in a financial year are treated as Identified Staff. The assessment is made on the basis of a template indicating all qualitative and quantitative criteria set out by the Regulation.

The EMC shall be responsible for conducting the aforementioned annual self-assessment and prepare a list of Identified Staff what will be approved by the BoD upon recommendation of the Nomination and Remuneration Committee ("NRC").

#### *Ceiling on variable remuneration*

- The ceiling on the total variable remuneration of the EMC is 50% of the total annual remuneration (equivalent to 100% of the fixed remuneration).
- The ceiling on the total variable remuneration of the ManCom is 50% of the total annual remuneration (equivalent to 100% of the fixed remuneration).
- The ceiling on the total variable remuneration for the Identified Staff is 25% of the total annual remuneration (equivalent to 33% of the fixed remuneration).

- The ceiling on the total variable remuneration for the individual employees is 25% of the total annual remuneration (equivalent to 33% of the fixed remuneration).

### **9.3 Paid remuneration**

If the variable payment is deferred, the deferral is over three years. 60% of the bonus is paid out in the year of the award and 20% in each of the subsequent two years. The variable remuneration consists only of settlements in cash.

The amounts listed in the following tables are represented in EUR, unless otherwise stated.

## **10 RECRUITMENT AND DIVERSITY POLICY (ART. 435(2)(B,C))**

In the selection and appointment of the Management Committee members to fill vacancies, the assessment will consider the candidates' good reputation, the balance of knowledge, skills, diversity, time and availability to perform their duties, and the experience of a candidate. Each member of the Management Committee must have thorough knowledge of the financial sector in general and their business area in particular. Each member must also have thorough knowledge of the Bank's social functions, of the interest of all the Bank's stakeholders and should possess adequate collective knowledge, skills and experience to be able to understand the Bank's activities including the main risks.

When the position of the CEO is to be filled, the selection, assessment and approval is done by the Board of Directors. For any other position within the Management Committee, the selection and assessment are done by the CEO, supported by the internal HR function, and finally approved by the Board of Directors.

The following criteria are taken into account for the selection and recommendation of an appropriate candidate: reputation, experience, governance, independence, individual and collective requirements. The suitability of the Executive Management Committee members is assessed according to the joint ESMA and EBA Guidelines (EBA/GL/2021/06) on the assessment of the suitability of members of the management body and key function holders.
